

BWS GRANDE

Bobbin Wounded Side Mount Sand Filter.
Aesthetic, Durable and Reliable

BWS sand filters have been produced for more than five years and they are well recognized by its strength and reliability. BWS GRANDE continues with this tradition.

The design of the top cover allows to have an easy and comfortable access to the inside of the tank for easy maintenance operation.

The filter tank is made of an inner fibreglass bladder to resist implosion and high pressure capability with a gel coat layer to avoid capillarity which is then continuously wound with fibreglass strands to create a high strength vessel. This process is recognized as one of the strongest methods of manufacturing a non corrosive high strength filter tank. All components are injection moulded from high strength engineering plastics.

The base is made of fiberglass making it strong and durable.

- Available from 1050mm/42" up to 1200mm/48".
- The maximum working pressure is 2,5Kg/cm².
- BWS sand filters go together with valve for models using 2" valve or and 3" flange.

Dimensions & Specifications

CODE	03010310	03010312	03010313	03010315
Ø Filter D mm	1050	1050	1200	1200
